

A better way to manage research

The future is in your hands

A better way to manage research

Research changes the world and we're changing the way you manage research. Our solution streamlines and manages all aspects of the research lifecycle across your organisation to give you the freedom to focus on research development.

We offer a complete solution that manages all aspects of the university research lifecycle, including pre & post award grants, research outputs, ethics and postgraduate students.

POWERFUL DASHBOARDS, PORTALS & REPORTING

- Customisable dashboards, easily personalised
- Creation of external researcher profiles at a variety of levels
- Inbuilt reporting tool

CRITICAL INTEGRATIONS

- Integration with University corporate systems using REST based web APIs or provider-agnostic feeders,
- Purpose-built integration solutions such as Symplectic Elements™, ARC Grants, NHMRC Grants, NHMRC HREA, ORCID

TIME-SAVING EFORMS AND WORKFLOW

- Innovative eforms & workflows technology provide administrators with the power to develop and customise online forms
- Fully configurable
- Auto-population, look up lists, copying or reuse of existing data and data entry verification checking
- User friendly mobile compatible forms

COMPLETE CLOUD SERVICES

- 'One-stop-shop' Cloud services means that application designers, programmers, installation, administration and support staff of your mission-critical systems are all under one highly capable roof

SUPPORT SERVICES

Comprehensive support services designed to assist clients quickly and thoroughly. Our Support Services include:

- A dedicated Engagement Manager assigned to each client.
- Implementation services such as thorough project management, business analysis, consultancy, data migration, eForm and workflow implementation services
- Assistance available for report writing, system upgrades and configuration, customisation and development of system integrations,
- Training and workshops to help identify system requirements, resource allocation and what's needed to make implementation of our solutions a success across your organisation.
