

# RME7

The ultimate  
research advantage

The future is in your hands

# RME7

## The ultimate research advantage

RME7 is the latest iteration of ResearchMaster's market-leading research administration solution: ResearchMaster Enterprise. Combining client feedback, insights from the RM user groups and the latest technological advances, RME7 provides a secure, user friendly and automated experience for all users.

### WHAT'S NEW?

- Clean and intuitive user interface
- Researcher Public Portal, empowering Researchers to increase their visibility to a wider audience by creating profiles showcasing their interests and achievements
- eForm enhancements including automatic reminder configuration and escalation, page layout customisation, email formatting and direct links, new Custom Related Item Control (RIC) and additional reporting capabilities
- End to end HDR lifecycle management using new eForm template categories for HDR processes in the HDR Candidature Management domain
- Scholarship Management and Payment Tool (SMPT): fully customisable, end-to-end scholarship management solution with inbuilt APIs enabling integration with key third-party systems
- Contract eForms domain to collect and manage contract and intellectual property information via online forms and automated workflows
- Additional Ethics committee meeting support including scheduling, attendee management, agenda, outcomes and actions
- ABN Lookup Web Services to import organisation details from the Australian Business Number (ABN) Register, reducing duplicate data and keying errors
- ORCID-RME Integration: collection and storage of authenticated ORCID iD in Personnel record, real time user access to ORCID account from RME
- Purpose built automated integrations with TRIM/Content Manager (document data and files) and ARC Grants (proposal and project applications)
- Extended API integration across the entire database, including all eForm domains
- Configurable Application Triggers to automate the creation and update of milestones for Projects, Ethics and Candidature Management

### KEY FEATURES

#### Usability

- Fast start up & improved performance
- Tablet & modern browser support
- Improved search functionality including save and share searches
- Comprehensive and customisable dashboards and widgets providing critical information at a glance
- Drag and drop layout designer

#### Security

- Single sign-on and multi factor authentication
- State of the art technology upgrades to reduce system vulnerabilities
- Controlled limited RME access for external users
- Oracle 19c database support

#### Accessibility

- WCAG 2.1 Level AA compliant
- Intuitive and responsive user interface to simplify navigation
- Custom help content for users to supplement existing online help
